Place Value Concentration with the Value Pak

Directions:

1. Work with a partner. Place the Base 10 Concentration cards facedown on the table.

2. Player 1: Turn over one card. Tell your partner what you need to turn over next to have a matching card.

3. Player 1: Turn over a second card. If your two cards match keep them. If the cards do not match turn them facedown again.

5. Keep taking turns until all pairs of cards have been found.
Directions: 1.) Count the blocks 2.) Show how many tens & one 3.) Write in addition sentence 4.) Write in the number

Number:

___________ tens and __________ ones

___________ +   ___________  = __________

Number:

___________ tens and __________ ones

___________ +   ___________  = __________

Number:

___________ tens and __________ ones

___________ +   ___________  = __________
Adding with Value Pak

**Materials:** base ten blocks or snap cubes (or pencil and paper to draw the cubes), equation cards

**Directions:**
1. Cut out the cards and place them in a pile face down.
2. Work with a partner. Take turns to flip over the top card in the pile.
3. Build each number that is shown on the card with snap cubes or base ten blocks (or do a drawing). Record the equation and compare your answers.
4. Repeat until all the cards have been turned over.

\[
37 + 20 = 57
\]

Ten More Ten Less

Directions:
1. Work with a partner.
2. Player 1: Spin the spinner (using a paperclip and pencil) and write the number on the chart in the middle column and shades in that number on their spinner.
3. Player 1: Write what is ten more and ten less.
4. Player 2: Repeat steps 2-3.
5. Keep taking turns until one player has all of their numbers shaded on the spinner.
Great Than, Less Than
2-Digit Numbers

Directions:
1. Work with a partner.
2. Player 1: Spin the spinner TWICE (using a paperclip and pencil) and make the largest number possible with the two numbers. Remember what you know about place value! Hint: The bigger number should go in the tens place.
3. Player 1: Record your number on the chart.
4. Player 2: Repeat steps 2-3.
5. Compare the numbers for each round and determine who is the winner of that round.
The winner is the player with the largest number.
6. Move on to the next round.

<td></td>
<td></td>
</tr>
</tbody>
</table>
## Materials:
- ten frame cards (cut out)

## Directions:
1. Work with a partner. Deal 8 cards to each player.
2. Both players turn over the top card in their stack. Players compare cards. The player with the greater number takes both cards and puts them on the bottom of their stack. If the cards are of equal value players turn over another card each and compare the new cards.
3. Both players record the result of the comparison on the chart below using the symbols <, >.
4. The game continues until one player has all of the cards.

<table>

**What Did I Add?**

**Materials:** numeral cards (cut out), create a spinner with a paperclip and pencil

**Directions:**
1. Turn the numeral cards face side down. Player 1 spins to get a starting number.
2. Player 2 picks a number card without showing your partner. Choose whether to add that many ones or tens to your starting number.
3. Player 2: Tell your partner the sum. Don’t go over 99!
4. Player 1: Tell your partner what number you think they added and explain your thinking. Record your answer in the space below.
5. Switch roles and repeat.

<table>
<thead>

</tbody>
</table>
4 in a Row

Materials: 20 counters (10 of one color and 10 of another color). You could use coins such as pennies and nickels, instead of colored counters.

Directions:
1. Player 1 gets 10 counters of one color and player 2 gets 10 counters of another color.
2. Player 1 puts a counter on the 2 numbers you will add.
3. Player 1 puts a counter on the sum in the 4 in a Row grid.
4. Player 2 moves 1 of the counters to a different number, adds the numbers, and puts a counter on the sum.
5. Continue taking turns until someone gets 4 in a row.

<table>
<thead>
<tr>
<th>4 in a Row</th>
</tr>
</thead>
<tbody>
<tr>
<td>37</td>
</tr>
<tr>
<td>66</td>
</tr>
<tr>

</tbody>
</table>
Directions: Solve the following addition equations with tens and one with Value Pak!

\[ 14 + 53 = \]

\[ 24 + 63 = \]

\[ 24 + 32 = \]

\[ 54 + 22 = \]
Directions:
Solve these problems with the ten frames using D.C.’s strategy (decomposing and composing). Remember to make a friendly number to make addition easier!

38 + 7 = ___

49 + 6 = ___
Directions:
1. Cut out the number cards and spread them out facedown on the table.
2. Start at number 55. This will be your starting number for both players.
3. Player 1 picks a card and adds that number to the starting number (55). Write the equation on the recording sheet.
4. The sum becomes the starting number in the next equation.
5. Now Player 2 picks a card and repeats step 3. Each player must take 6 turns.
6. The player who gets closest to 95 without going over is the winner.

<table>
<thead>

<td></td>
</tr>
</tbody>
</table>
Directions:
1. Cut out the number cards and spread them out facedown on the table.
2. Start at number 25. This will be your starting number for both players.
3. Player 1 picks a card and decides if they should add that number of tens or ones to the starting number (25). Write the equation on the recording sheet.
4. The sum becomes the starting number in the next equation.
5. Now Player 2 picks a card and repeats step 3. Each player must take 6 turns.
6. The player who gets closest to 95 without going over is the winner.

Player 1

25 + _____ = _____

_____ + _____ = _____

_____ + _____ = _____

_____ + _____ = _____

_____ + _____ = _____

_____ + _____ = _____

Player 2

25 + _____ = _____

_____ + _____ = _____

_____ + _____ = _____

_____ + _____ = _____

_____ + _____ = _____

_____ + _____ = _____
## Find the Missing Number

Directions:
1. Look at the sums given and determine what 2-digit number makes the equation true.
2. Use the number cards to fill in the equations. You can only use each number card once.

<table>
<thead>
<tr>
<th>Equation</th>
<th>Missing Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>$51 = 1 _ _ _ + 32$</td>
<td>21</td>

Directions: Solve the following addition equations with tens and one with Value Pak!

\[ 37 + 26 = \]

\[ 18 + 55 = \]

\[ 34 + 57 = \]

\[ 28 + 56 = \]
**Compare the Length**

**Directions:** Put the objects in order from shortest to longest. Label the shortest object 1, label the middle object 2, and label the longest object 3.

1. [Image of objects]

2. [Image of objects]

**Directions:** Compare the 3 objects below. Fill in the blanks to complete the sentence.

The [Object] is taller than the [Object] and [Object].
Object Compare

Directions: Using a piece of string or yarn compare the lengths.

Which house is closer to the park? Circle the house that is closer to the park.

Are the swings or the seesaw closer to the basketball court? Circle which one is the closest.

Find a piece of paper and a pair of scissors and compare the lengths. Which one is longer? Fill in the sentence below.

Find a pencil and a marker to compare the lengths. Which one is shorter? Fill in the sentence below.

The __________ is longer than the ______.

The __________ is shorter than the ______.
