Visual Model Story Problem Puzzle

Directions:
1. Cut out all of the cards.
2. Mix up all the cards and spread them out.
3. Build the 3 different puzzles by finding the word problem, the equation, and the visual model that match.
There are 8 students reading books. Then 5 leave to go to the computer center. How many students are still reading books?

\[ 8 - 5 = \underline{\phantom{0}} \]

\[ \underline{\phantom{0}} + 5 = 8 \]
There are 8 students at the reading table. 5 of the students are boys and the rest are girls. How many girls are at the reading table?

\[
5 + \_\_ = 8 \\
8 - \_\_ = 5
\]
There are 5 students at the reading table and 3 students at the computer table. How many more students are at the reading table than the computer table?

5 - 3 = __

3 + __ = 5
There are 3 boys and 5 girls at the computer table. How many students in all are at the table?

3 + 5 = ___
